2012 SNM Highlights Lectures

MIAMI, 2012

Neurosciences Highlights

The society now has a new name—the Society of Nuclear Medicine and Molecular Imaging (SNMMI)—and is looking to the future. At the same time, I want to honor Henry N. Wagner, Jr., MD, who for many years gave the annual Highlights Lecture at this meeting. I had the pleasure of seeing him earlier this year in Hamamatsu, Japan. He remains enthusiastic about advances in neurologic molecular imaging. As you may know, he put himself

Mental Health Research Institute, and the University of Melbourne (all in Melbourne, Australia) and AstraZeneca R&D (Södertälje, Sweden) reported on “Comparison of ¹¹C-PB and ¹⁸F-AZD4694 for AB imaging in aging and dementia” [149]. Their study showed that with the same acquisition timing, processing, and display scale

Neuroinflammation and Cholinergic Investigations

Neuroinflammation is not specific to AD, and many people are finding that it plays a role in a range of neurologic disorders. One example was the presentation by Ribeiro et al. from Université François Rabelais (Tours, France) and the University of Sydney (Australia), who reported on “Evaluation of neuroinflammation in amyotrophic lateral sclerosis [ALS] with ¹⁸F-DPA-714” [35]. Patients with ALS had slightly elevated neuroinflammation when compared with normal controls (Fig. 12).

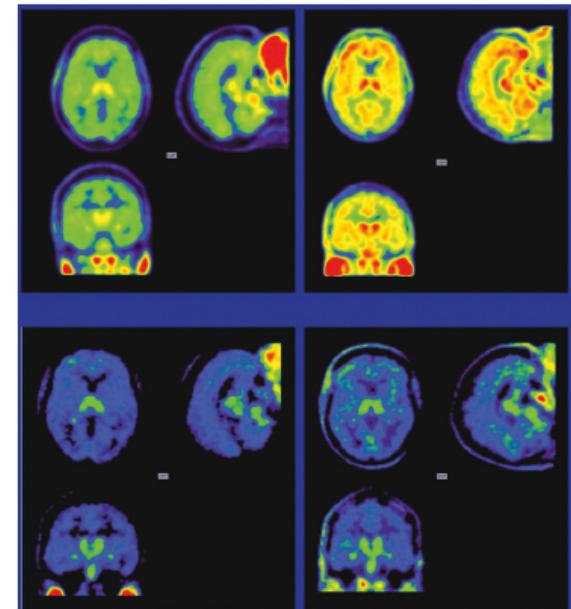

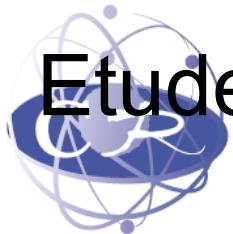

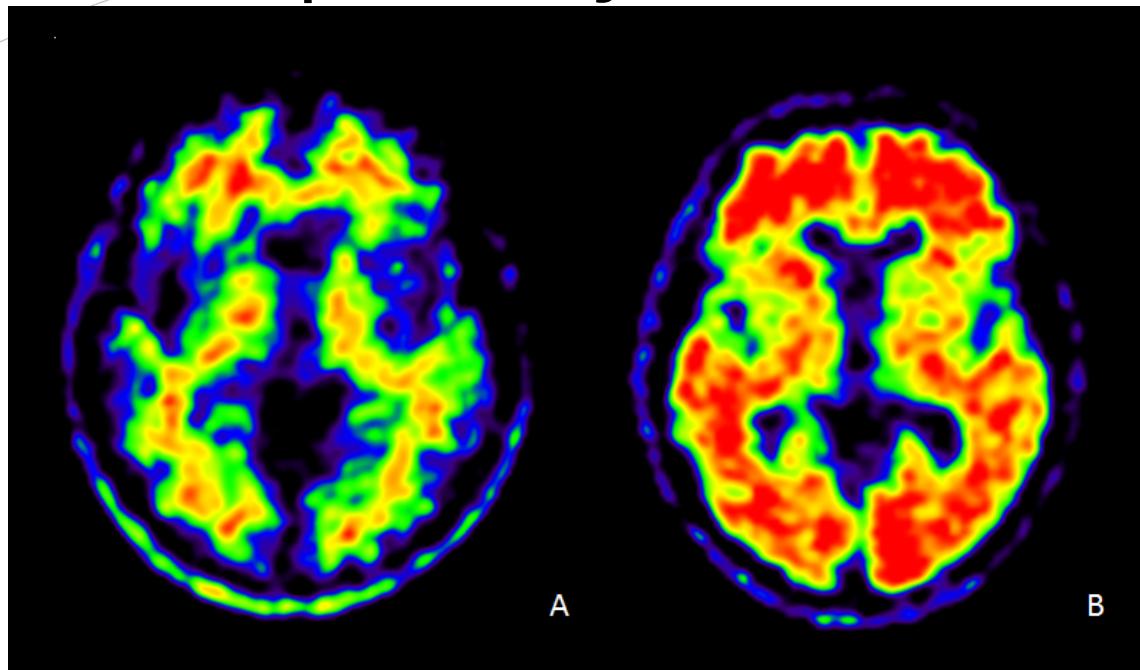

FIGURE 12. Neuroinflammation imaging in (left) controls and (right) ALS patients shows (top) ¹⁸F-DPA-714 integrated images and (bottom) ¹⁸F-DPA-714 distribution volume relative images.

Programme Multicentrique « NICAD »

(ANR grant) +(DGOS grant

Project Acronym	NICAD Neuroinflammation
Project Title	NeuroInflammation and Cognitive decline in Alzheimer's Disease: a pilot study of PET imaging of the translocator protein ligands (TSPO) with [¹⁸ F] DPA-714
ANR number	ANR-13-PRTS-0021
Project coordinator	Caroline Hommet MD, PhD
Partners	Partner 1: CHRU Tours – CMRR (Tours, Nantes, Rennes, Caen, Toulouse) – CIC and CIC IT Partner 2: UMR INSERM U930 “Imagerie et cerveau”, Université Tours
Start date/end date	30 Mar 2014 / 30 Sept 2018 (54 months)
Total budget (€)	713 514 € 142 472 € (ANR grant) 571 042 € (DGOS grant)
